

## **Technical Specifications**

### **Arena Size**

Minimum 30m x 30m. Maximum 60m x 60m. Optimum 40m x 40m or 40m circle.

For safety reasons please ensure the arena is as level and flat as possible, and completely and suitably fenced. With regards meet and greet purposes following the display an area of approximately 3m x 3m would be ideal, preferably just outside the arena, although this can easily be back at the horsebox/stable tent.

### **PA Requirements**

It is vital that we have two wireless hand held microphones. We also require a CD sound system with competent operator.

### **Access**

Our horsebox is a 13t HGV which is 10.5m long, 3.9m high and 2.75m wide. Please consider suitable access.

### **Over Night Parking Area**

We are a self contained unit so will not require any extra stabling/marquee. Area required for horsebox/stable tent is 15m x 15m, and must be in a secure, grassed area. Please consider where you site us, as we will need to move the horses from here into both the warm up area and arena, and back again. If required, meet and greet following the displays can be incorporated into this area.

### **Warm Up**

It is vital that we have an area in which we can warm the horses up prior to the display. Ideally about 20m by 20m, but anywhere safe to canter the horses will suffice.

### **Performance Times**

Please ensure a minimum of two hours between performance start times. Please let us know as soon as possible if the arena is running ahead or behind schedule.

### **Water and Electricity**

Please provide access to fresh water. Electricity is not necessary, but is always appreciated!

### **Muck**

We bring two horses who produce muck! We can either make a very neat muck heap or are happy to load waste into a skip or bin. We use straw to bed the horses down, and always leave the site as clean as possible.

**Please ensure you are able to fulfil these requirements. Failure to do so may result in us being unable to provide you with the full display. In this case the full fee will still be due.**
